

FOAM TOTE TRAILERS

Foam Tote Trailers from Chief are quick deploying foam utility trailers capable of handling small ground level fires while also providing foam support to larger equipment. Standard self-educing automatic nozzle flow rates available up to 5000 GPM (18927 LPM) allow for a capable fire fighting platform. With complete under-deck foam and water line routing as well as anti-slip decking, the fireman will always have sure footing. Trailers are available in single, dual, triple, and custom quantity tote configurations with numerous options available. Easy to deploy and maintain, tote trailers are a mainstay of industrial fire fighting.
