

## Ball Valve

## VBV-R-64

The VIDAFOR Adjustable Ball Valve Lockout VBV-R-64 is a durable and versatile solution for locking ball valves. Made from reinforced nylon, it secures valves with diameters of 1.3cm to 6.4cm, offering reliable protection in extreme industrial environments.

### KEY FEATURES

<b>Material</b>	PA66 nylon reinforced with 15% fiber, offering durability and resistance to extreme environments
<b>Size</b>	171mm (L) x 77mm (W) x 103mm (H)
<b>Weight</b>	170 g

### DESIGN

- Adjustable to fit pipes with diameters from 1.3cm to 6.4cm in the closed state and 1.3cm to 3.2cm in the open state.
- Suitable for ball valves with DN8-DN50 specifications.
- The four-point fixed design prevents valve handle rotation for secure locking.
- Divided into two parts: one for fixing the handle shaft and the other for securing the handle.
- Includes an 8mm lock hole, compatible with padlock shackles up to 8mm in diameter.

### DURABILITY

- Resistant to extreme temperatures (-46°C to +200°C).
- High crack resistance, wear resistance, and environmental endurance.

### COLOR

Red for high visibility.

### USAGE

Ideal for factories, hospitals, power plants, and other industrial applications.

### CERTIFICATIONS

- ISO9001
